

SYED ABDULLA

Software Engineer | Frontend (React · TypeScript) · Full-Stack | Open to GCC relocation

Bengaluru, India | +91 88676 18049 (WhatsApp) | syedabdulla761@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with **3+ years** building Simba, insightsoftware's enterprise embedded-analytics platform: React/TypeScript architecture, data-heavy AG-Grid UIs and WCAG accessibility, with hands-on Spring Boot backend experience. Owns the public Playground (playground.simba.com) end-to-end, led the AG-Grid v35 migration (−42% bundle) and has closed 305 Jira tickets with **zero sprint spillover**. UVCE CSE '23 (CGPA **9.09**), **Siemens Scholar**.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, AG-Grid (Enterprise), Blueprint.js, HTML5, CSS3, WCAG/a11y.
Backend: Java, Spring Boot, Spring Security (ACL), Spring Data JPA, Liquibase, PostgreSQL, JUnit, C# (.NET), REST APIs, Docker.
Infrastructure & Tools: Git, GitHub, GitHub Actions, Bitbucket, Jira, Confluence, Jenkins, SonarCloud, Kubernetes, Agile/Scrum.
AI & productivity: GitHub Copilot Agents, Claude AI, Gemini, AI-assisted Code Reviews.

PROFESSIONAL EXPERIENCE

insightsoftware | Bengaluru, India — *Feb 2023 – Present*

Product: Logi Composer (Simba BI Platform, formerly Logi Symphony) | playground.simba.com

Software Engineer — *Sep 2025 – Present*

- **AG-Grid Migration (v31 → v35):** Led the grid upgrade across **15+ modules**: authored the spike (**50+ breaking changes**, **17-ticket** roadmap), migrated **58 TypeScript files** and **30+ custom cell renderers** to the modular v35 architecture, and cut the grid bundle **42% (gzipped)** by registering only the modules in use.
- **Folder Organization (Full-Stack):** Built the Spring Boot backend for hierarchical Library folders: JPA entities/DAOs, REST APIs and **3 folder-scoped roles** via a custom Spring Security ACL evaluator, advisory-lock name uniqueness and E2E auth tests. Implemented per-user private folders (~4K LOC): event-driven provisioning, Liquibase backfill, admin preview/execute migration, atomic sharing-driven moves; plus the React Library tree, breadcrumbs and folder dialogs.
- **SSR Embedding (End-to-End):** Single-handedly delivered Self-Service Report embedding from spike to docs handover, enabling report embedding via Embed Manager with SDK events and embed snippets.
- **Platform Unification & Homepage Revamp:** Spearheaded the homepage redesign into a task-focused interface with theming, consolidating **5+ admin workflows** into a unified experience.
- **Source V2 & Feature Delivery:** Built the Connections tab (tree-structured UI), File tab, and right panel for Source V2. Independently delivered Hierarchical Filter Phase 2 and Auto-Apply Filter Panel with **zero spillovers** across **6+ sprints**.
- **Playground AI & Showcases:** Integrated the AI chatbot (visual generation, data Q&A, programmatic Bot API), added pixel-perfect, Crystal Reports and white-labelling showcases, and set up per-branch preview deploys with GitHub Actions.
- **WCAG Accessibility:** Resolved a full quarter's a11y tech debt (**35+ fixes**), fixing aria-hidden/tabindex conflicts and implementing screen reader patterns with Blueprint.js FormGroup across dashboards, source editor and menus, improving compliance by **~40%**.
- **Cross-Platform Bug Resolution:** Diagnosed and fixed a critical IIS Windows deployment bug (HTTP 404.11) caused by encoded characters in composite URLs, impacting **100%** of Windows-deployed customers.
- **Release Maintenance:** **305 Jira tickets** closed since 2023 (95 bugs, 4 technical spikes) and **89 backports** across 11 supported releases, incl. customer escalations.
- **AI-First Workflow:** Shipped 20+ tickets with agentic workflows (Copilot coding agent for implementation, Claude Code for design and review), reviewing **150+ agent commits**.

Associate Software Engineer — *Jul 2023 – Aug 2025*

- **Playground App:** Own the public Playground (React + Spring Boot) end-to-end, publicly deployed and marketed worldwide at playground.simba.com as the product sandbox for insightsoftware's thousands of client companies.
- **Hackathon Win:** Led frontend for a new "Composer" hackathon feature, later approved for the product roadmap.
- **Code Quality & Backend:** Drove SonarCloud **High-severity bugs to 0** in the frontend; contributed to Spring Boot API enhancements for enterprise clients.
- **Performance:** Resolved a browser crash on line charts rendering **130K+ data points** (stacked-value computation).
- **DevOps & Infra:** SonarLint quality gates; fixed Kubernetes/Docker startup and CentOS 7/PostgreSQL 12 deploy issues.

Software Engineering Intern — *Feb 2023 – Jun 2023*

- Migrated the product's logging library from Raize to Serilog (C#/.NET), improving maintainability.

EDUCATION

B.Tech, Computer Science & Engineering | University Visvesvaraya College of Engineering (UVCE), Bengaluru — *2019 – 2023*
CGPA: **9.09** | **Siemens Scholar** (Full Scholarship) | 12th: **96.16%** | 10th: **96.48%**

RECOGNITION

Rated **"Exceeds Expectations"** in 2 consecutive reviews (2025, 2026) | Promoted to SE in **2 years** | Manager: "Strong ownership, technical skill, and collaboration."

Languages: English (Professional) | Hindi (Professional) | Kannada (Native) | Telugu (Conversational)

Availability: Indian national (valid passport) | Notice period: 60 days | Ready to relocate on an employer-sponsored work visa
